

Rebound Dynamics

Changing How the World Views Inventory

The Inherent Discrepancy Between Digital and Physical Inventory

Relying on manual processes and human data entry is the root cause for:

Inventory Shrinkage

Excess Cash held as a safety stock

Non-Productive Time

Excess Cash held as a safety stock

Real-Time Inventory Visibility

- ✓ Fully trusting that the quantities in your digital system reflect the quantities in your inventory
- ✓ Freeing up working capital currently tied up in excess inventory
- ✓ Eliminating the need for costly cycle counts
- ✓ Eliminating duplicate purchases
- ✓ Stopping lost sales due to inventory inaccuracies
- ✓ Drastically reducing inventory write-offs and increasing accountability

Who We Are

-  A cutting-edge technology company
-  We eliminate the inherent discrepancies that exist between the digital and physical inventories of the Industrial MRO Market
-  A platform solution that drives real dollars to the bottom-line across market segments

Process Reduction = Higher Level of Inventory Control

Eliminate

Automate

Simplify

- Cycle Counts
- Loss of Sales
- Duplicate Purchases

- Inventory control (reduce loss/shrink)
- Transaction data

- Supply chain processes are improved by real-time consumption data
- Use of analytical data
